

C90GTi RAISBECK *EPIC* PERFORMANCE SYSTEM

FAA-CERTIFIED PERFORMANCE
PROPELLERS TO PROVIDE THE
EXTRA THRUST TO CARRY THE
10,500 LBS GROSS WEIGHT!

**10,560 POUNDS RAMP WEIGHT/10,500 POUNDS TAKEOFF WEIGHT
INCREASED GROSS WEIGHT**

CERTIFIED WORLDWIDE AND AVAILABLE EXCLUSIVELY THROUGH RAISBECK AUTHORIZED DEALERS

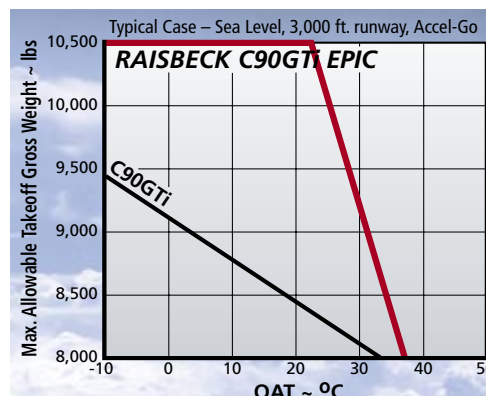

“Executive Flight operates our Raisbeck-equipped C90GTi for charter with a two pilot crew. Raisbeck’s Dual Aft Body Strakes and Crown Wing max range trip. This, along with the Wing Lockers, greatly increases the utility and flexibility of the aircraft.” – Tim Thompson, Pilot/Director

RAISBECK CONTINUES to be the leader in performance for all Beechcraft King Air upgrades, and the C90GTi is no exception. With an increased ramp gross weight to 10,560lbs and takeoff weight to 10,500lbs, there is no other way to carry more payload and fuel than Raisbeck’s EPIC Performance System. Each system that comprises the C90GTi EPIC, works in synergy with the other to deliver across-the-board improvements. Benefits also include the ability to take off and land in thousands of additional airports, while reducing operating costs and providing a quiet, more comfortable cabin environment. Outperform the basic C90GTi with Raisbeck’s C90GTi EPIC upgrade today.

C90GTi EPIC ELEMENTS

OPTIONAL EQUIPMENT

RAISBECK/HARTZELL 4-BLADE QUIET TURBOFAN PROPELLERS – THE PERFORMANCE PROPS!

With over 1,000 installations to date, our Quiet Turbofan Propellers have been providing C90 operators with increased performance through our innovative blade and hub design.

- 93" diameter
- Provide the extra thrust for takeoff needed to safely support the increased gross weight
- Oversized hydraulic piston for absolute lock-in propeller synchrophasing
- More efficient airfoil allows cruise RPM to be reduced without performance loss
- Not shot peened, reducing overhaul cost and downtime

DUAL AFT BODY STRAKES

With over 25 years of proven performance, our Dual Aft Body Strakes are the ideal companion to our Quiet Turbofan Propellers and increased gross weight to complete our C90GTi EPIC package. Standard on Hawker Beechcraft’s 350 series aircraft production line, they replace the standard ventral fin to provide C90GTi operators greater control and improved handling qualities in flight.

- Reduce drag in all flight modes
- Extend stringer fatigue life
- Raisbeck Strakes are a key element in every EPIC package
- Improve passenger ride quality and pilot control

GROSS WEIGHT INCREASE

At ISA (15°C), the Raisbeck EPIC-equipped C90GTi is able to take off with more weight (1800 lbs passengers/fuel) at a hotter temperature than the basic C90GTi series aircraft.

“We are very pleased with the Raisbeck EPIC installed on our C90. The Quiet Turbofan Propellers provide a quiet cabin and great performance. The Crown Wing Lockers are great for keeping our guns, fishing rods and skis out of the cabin. Having EPIC installed gave us the gross weight increase, too—a huge benefit to us, because it’s one more person and additional gear!”

– David B. Erickson
President, King Air C90 LJ-1194

CROWN WING LOCKER SYSTEM

The Crown Wing Lockers are FAA-Certified to carry 600 pounds in 17 cubic feet of secure storage space. The Lockers are designed to be area-ruled to reduce drag and stall speeds. Constructed of lightweight, infinite-life composites, they are easily removed and are fully self-contained to ensure a clean, dry interior in all weather.

- Carry larger equipment, luggage and medical equipment outside the cabin
- Make room for additional passengers
- Secured with Medeco safety locks
- Fully certified for commercial and private operations

TRANSFORM YOUR KING AIR C90GTi

into the best performing business aircraft on the market with our advanced performance engineering. That's not bragging. Well, maybe it is! Our performance benefits are most enjoyed mid-flight, so go ahead, take us for a spin.

Benefits

"We are enjoying the benefits of the Raisbeck EPIC and its new props. Immediately, I noticed the difference in acceleration on takeoff, even with its heavier payload. Climb and cruise are better, too, especially at the higher altitudes. Landing distances are also shorter when using the props to decelerate. Perhaps the biggest benefit to our flight operation is the higher gross weight limit. This provision has allowed me to carry an additional passenger or another half hour of fuel on board where I would not have been able to otherwise. I am proud to fly this exceptional King Air. These Raisbeck systems have made this great airplane even better."
 — Ben Kester, C90B LJ-1686

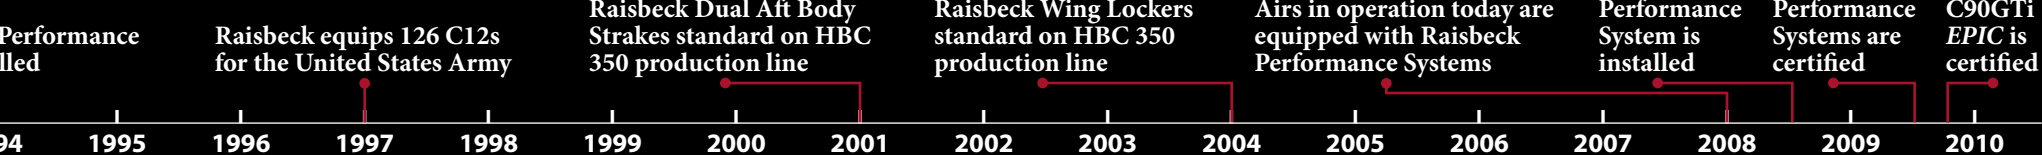

TAKE OFF FROM MORE AIRPORTS WITH MORE PAYLOAD
 Raisbeck's EPIC-equipped C90GTi can take off safely from shorter runways at a higher gross weight, accommodating each and every mission you fly! Compromise nothing.

- CONTROL YOUR FLIGHT DESTINY**
- FAA-Certified Airplane Flight Manual Supplement
 - Illustrated Parts Catalog
 - Maintenance Manual
 - Certified performance comes standard with every C90GTi EPIC.

ARRIVE WITH A COMPETITIVE EDGE
 With our Quiet Turbofan Propellers, we offer you and your passengers a truly state-of-the-art flight experience in a much quieter environment. Leave the distractions behind and focus your creative energy in the sky without noisy interruptions. Or, simply enjoy the cabin's peace and quiet, and arrive at your destination rested and energized. Let your competition deal with noise fatigue.

RAISBECK-EQUIPPED C90GTi OUTPERFORMS THE REST
 Raisbeck enhanced C90GTis are able to take-off and land in thousands of additional airports, removing operational restrictions. Use up to 10 percent less runway, carry more payload, and choose your destination. Our engineering technology is critical—your time is invaluable.
