EPIC + Crown Lockers maximize King Air performance, utility and comfort

Several years ago we took a dealer suggestion to market, and introduced the term *EPIC* for our performance packages. We have had great acceptance of the name and the idea that a Raisbeck *EPIC* transforms the performance of King Airs. Now, we are ready to expand this idea with the *EPIC+*, as in the *EPIC+* Crown Wing Lockers for the ultimate in performance, utility and comfort.

Also, we have recently received approval for an improved wing weight design for aircraft that require weights to be installed for operations up to 10,500 lbs (LJ-1138 through LJ-1145, LJ-1147 and after). The improved design shortens the installation time and installs the weight inside the wings, eliminating the need to paint them.

Please contact Aaron Jo-Nes, our Technical Support Manager,

With this we are reintroducing the Crown Lockers to our *EPIC* completion incentives and adding an *EPIC+* completion program.

Customers who purchase Crown Wing Lockers with the performance system(s) needed to complete a 200 series *EPIC PLATINUM* or *EPIC GOLD* will also receive a \$2000 credit off of the purchase of Crown Lockers. **Additionally, aircraft that are already equipped with *EPIC GOLD*, *EPIC PLATINUM* or *EPIC*-equipped C90s now have this same \$2000 incentive to complete their *EPIC+* with Crown Wing Lockers.**

With our C90 Gross Weight Increase at 10,500 lbs, the Crown Wing Lockers are the perfect way to utilize that extra weight while keeping the cabin clean, clear and clutter free. With the C90 *EPIC+* you can take all the passengers, fuel and equipment you need.

if you have a customer who needs the weights to upgrade to the 10,500 lb Gross Weight Increase. Any C90s that are not required to

install the weights for operations above 10,350 lbs (LJ-527 thru LJ-1137 and LJ-1146 do not require weights), need only the current flight manual supplement to take advantage of our Gross Weight

Increase to 10,500 lbs.

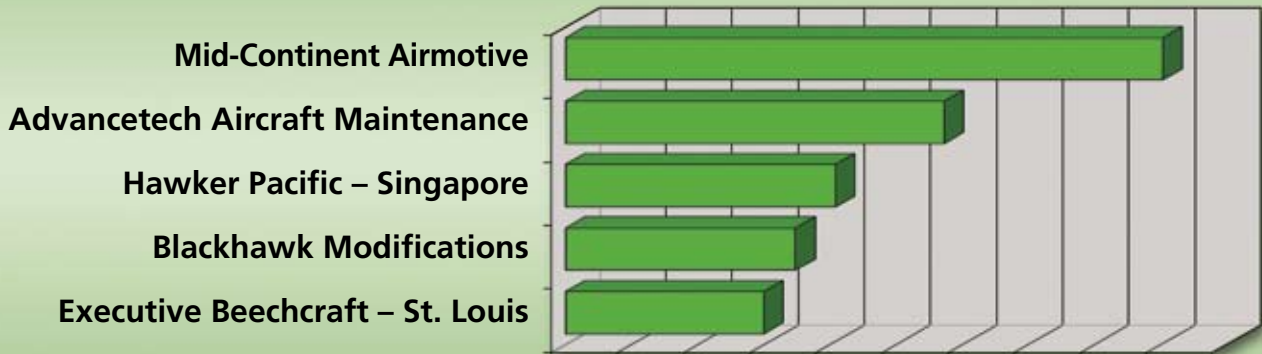

EPIC+ maximizes the performance, utility and comfort of all King Airs. Now existing *EPIC* customers have access to incentives to add Crown Wing Lockers and get the most out of their workhorse! ➔

Now existing EPIC customers have access to incentives to add Crown Wing Lockers and get the most out of their workhorse!

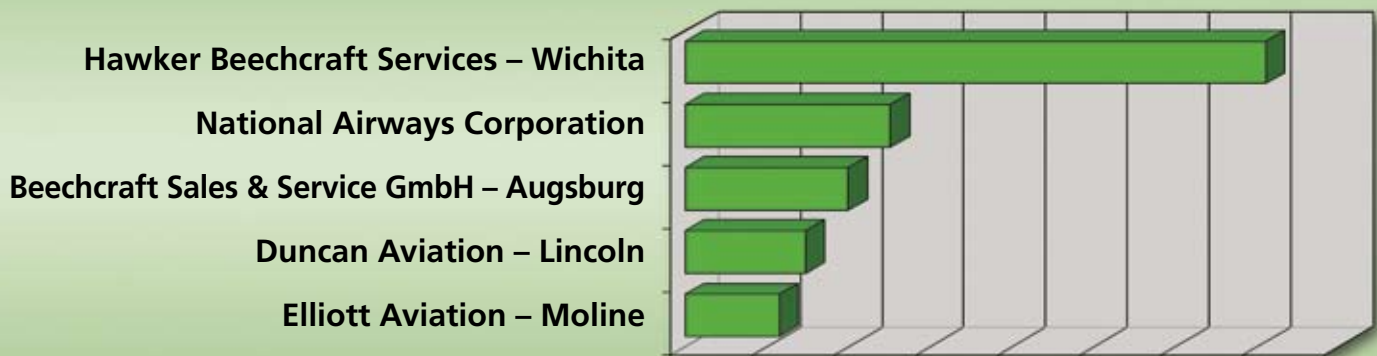

Scott Keefe
Sales Manager, King Air Performance Systems

Mid-Continent Airmotive, Oklahoma City, Okla. – **Gary Riggs** fired up the grill and got cooking with a C90 EPIC + Crown Wing Lockers. Now that’s an award-winning recipe!
